\* Operator

The year 2002-3 has again been a profitable one for your company.  
We made an after tax profit of \$0.7M, an operating profit of \$1.1M.  
Our cash reserves at year end stand at a healthy \$4.2M and  
we are debt free.

We have continued to fund the business from SE Gobe production cash flow and have not had to seek any new equity capital.

Although the current year result is behind the 2002 result, one must remember that result included a significant capital profit from the sale of our Yolla gas field interest.

In addition, the current year's result incorporates lower production barrels from SE Gobe due to the natural decline in the field production rate.

We sold our 138,618 barrels share of production at an average of US\$28.82 per barrel. The continuing high oil prices have partially helped counteract the natural decline of the Gobe production rate. Oil prices have remained firm and are materially assisting our ability to fund the business of the company. We do not hedge either oil prices or currency price exposure.

Steady progress has been achieved on the development of the Oyong oil and gas field in the Sampang PSC offshore East Java, Indonesia. A plan of development has been submitted to the Government by Cue and our joint venture partners, Santos and El Paso. A gas sales agreement has been signed with PT Indonesia Power to supply the total gas production of the field to their electricity generation plant at Grati in eastern Java. First oil and gas production is expected in 2005.

We are conducting further drilling in the Sampang area with the spud of the Mangga well on 27 September. Mangga has the potential to contain similar volumes of hydrocarbons to Oyong. Infill 2D seismic has also been run over several other Sampang drilling targets and further wells are a strong possibility. We have been active in assessing new exploration opportunities in Indonesia. We bid with Santos for an offshore block in the 2003 bid round but were unsuccessful.

In Papua New Guinea, our other core business area, we participated in the small Bilip-1 oil discovery. Options to develop this discovery are still being evaluated. Our Kimu gas field interest is being assessed for potential methanol production feedstock. Oil Search, the PNG Government, Mitsubishi Gas Chemical Company and Itochu Corporation of Japan are investigating the possible options to commercialise gas fields like Kimu. If this were to progress to a commercial outcome, the value upside for Cue is significant.

Cue has been active on the acquisition front. In 2003 we made a serious bid for ChevronTexaco's PNG interests but were outbid by Oil Search who paid US\$96.6M for the assets and business. We have also continued to assess exploration acreage offerings and plan to continue to do so.

Your company, although small, has useful production to fund growth, has cash reserves, no debt, an oil and gas development at Oyong and a number of promising exploration opportunities. Your Board and management are totally focussed on the core business of oil and gas exploration and production. The business is run on a very low cost base and the hard work of Chief Executive Bob Coppin and Chief Financial Officer Andrew Knox is much appreciated. Your Board of Directors have a breadth of relevant industry experience to provide the governance and strategic leadership shareholders naturally expect.

In conclusion, your company is in good shape, and we all hope the next financial year will be another sound performance by the company.

**Richard Tweedie**  
Chairman

In 2006-08, oil production from SE Gobe continued, steady progress toward development of the Oyong field was achieved and several areas for corporate growth were pursued.

During the past year we continued to focus mostly on our existing areas in Papua New Guinea and Indonesia. However, we also sought new areas for growth in Australia, New Zealand, Papua New Guinea and Indonesia and as a result made an unsuccessful, but substantial, bid for Chevron Niugini Ltd and participated in the recent offshore exploration acreage bid round in Indonesia where we bid with Santos on an exploration block but were unsuccessful. We also reviewed a number of other new acreage opportunities.

## PAPUA NEW GUINEA

### Production

Cue's share of oil production from the SE Gobe field for the year was 138,618 barrels and at the end of the year the field was producing at a rate of around 9,600 barrels of oil per day with Cue's net share at that time being 370 barrels of oil per day.

In February 2003, additional gas injection compressor capacity was commissioned for the field which allowed the oil production rate decline to be slowed, due to the increased ability to reinject the larger volumes of gas that are being produced as the field declines, rather than to further restrict the oil production rate to limit the amount of produced gas. It is a government requirement that produced gas be reinjected rather than flared. The additional gas injection capacity will allow incremental oil reserves to be recovered prior to the field reaching an economic cut off point in around 2009.

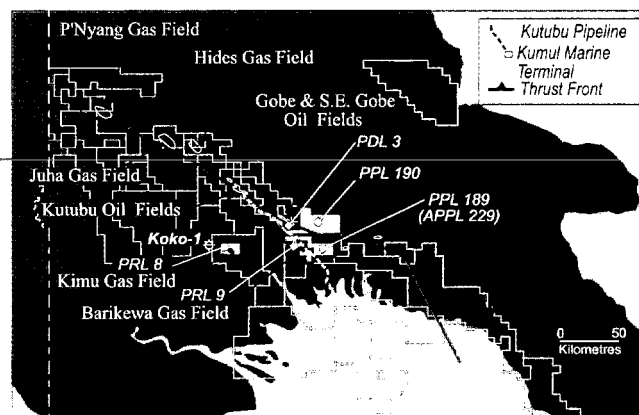

The 2003 SE Gobe Reserves Report prepared by Chevron, the operator of the field, shows that as of April 30 2003, the estimated ultimately recoverable (3P) reserves were unchanged at 44.2 million stock tank barrels. Over the past year, 3.6 million stock tank barrels were produced leaving an estimated 15.7 million barrels of proved and probable reserves and 4.2 million barrels of possible reserves to be recovered. The estimated total recoverable gas volume remains unchanged from last year at 270 billion cubic feet.

### Exploration

Bilip-1 spudded in October 2002 and was designed to primarily test an upper or hanging wall structural objective similar in style to the SE Gobe field and to the Saunders-1 oil discovery in PDL-4. The well was designed to be potentially deepened to a more risky sub thrust footwall objective. The Bilip structure straddles the boundary of PPL190 in which Cue has a 10.97% participating interest and the adjacent licence PDL-4 in which Cue does not participate. The upper closure was assessed predrill to have the potential to contain around 30 million barrels of recoverable oil within PPL190.

Bilip-1 encountered the primary objective lagifu sandstone at the deeper end of the predicted depth range due to the presence of additional interpreted thrusts within the overlying seal section. Wireline logs and pressure data indicated the presence of a 16 metre oil column with an oil water contact, overlain by a 15 metre gas column to the top of the

Papua New Guinea Location Map

sand. A closed chamber drill stem test of the oil interval recovered 46° API gravity oil at an estimated daily rate of 2,000 stock tank barrels per day.

The well was deepened to the footwall target without Cue participation and reached a total depth of 2,812 metres without encountering significant hydrocarbons in the deeper section.

Post drill mapping and estimates of the likely recoverable oil volume within PPL190 have shown that because of the disposition of the oil in a thin rim beneath a gas cap, the recoverable volume is likely to be less than one million barrels within PPL190 and would be difficult to produce commercially.

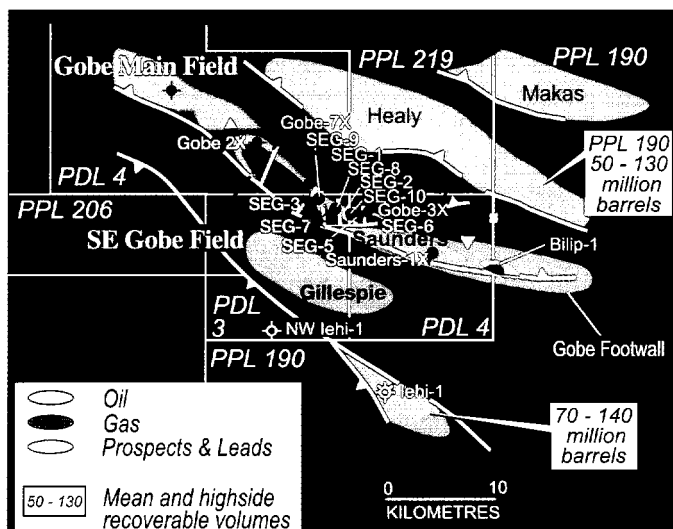

In December 2002, the Minister of Petroleum and Energy, Papua New Guinea granted five year Retention Licences over the Kimu (PRL-8) and Barikewa (PRL-9) gas fields. Kimu, as currently mapped, has been assessed by Oil Search, the operator, to hold recoverable gas volumes in excess of 1 trillion cubic feet of recoverable gas (Cue's share approximately 110 billion cubic feet) and Barikewa is estimated to contain approximately 800 billion cubic feet of recoverable gas (Cue's net share approximately 120 billion cubic feet).

In July 2003, Oil Search announced that it had entered into an agreement with Mitsubishi Gas Chemical Company Inc and Itochu Corporation of Japan to complete a feasibility study into the potential use of gas, such as that contained in the Kimu field, as feedstock for the manufacture of methanol in PNG. This is a positive development which could lead to commercialisation of our stranded PNG gas.

During the year, the Papua New Guinea Minister for Petroleum and Energy cancelled PPL194 in the highlands of PNG. An earlier geological survey was undertaken by Cue over the NW Wage anticline in the north west of PPL194 in order to determine whether structural closure was likely to be present. The results of the survey proved negative and further high risk exploration in the area could not be justified. Our proposal to undertake alternative exploration in the central area of the licence was not approved by the Minister.

In July 2003, Cue submitted an unsuccessful substantial bid for Chevron Niugini Ltd which was purchased by Oil Search for US\$96.6 million. Chevron Niugini Ltd owns interests in the Kutubu, Moran, Gobe Main and SE Gobe producing fields as well as interests in undeveloped natural gas resources within Papua New Guinea.

Papua New Guinea SE Gobe Area

## INDONESIA

### Development

A plan of development for the Oyong oil and gas field has been prepared and submitted to the Indonesian authorities for approval. The plan envisages a simple four legged platform with facilities for oil and gas production.

Oyong contains approximately 105BCF of recoverable gas, including solution gas, and at least 6 million barrels of recoverable oil from the approximately 80 million barrels of oil that are estimated to be in place.

The oil and gas will flow from the platform to Grati, East Java in a multi phase 14 inch diameter pipeline where they will be separated and processed onshore. The pipeline will have a design capacity of 60 million cubic feet of gas per day and 10,000 barrels per day of fluids.

Two gas development wells will be drilled near the crest of the field and initially three horizontal oil development wells will be drilled through the 38 metre oil column of the field. The initial oil production rate will be approximately 3,500 barrels of oil per day. However, additional horizontal oil development wells may be drilled depending on the production characteristics of the initial wells and would increase the oil production rate and access additional oil reserves.

Front end engineering studies have been completed for the field, as have pipeline route and platform location surveys. Engineering contracts for the development have been released for tender and an environmental impact assessment study is in progress, with environmental approval expected early in 2004.

On July 19 2003, a Gas Sales Agreement was signed for the sale of the entire gas reserves of the Oyong field to PT Indonesia Power.

The gas will be supplied to PT Indonesia Power's 766 megawatt open and combined cycle gas turbine electricity generating facility at Grati. The gas is expected to be produced at a minimum rate of 40 million cubic feet of gas per day.

Oyong is expected to begin production in the first half of 2005.

During the year, Cue held discussions with potential lenders to finance Cue's share of Oyong development costs. Cue has received an expression of interest to project finance Cue's entire share of these costs.

### Exploration

Over 1,000km of infill 2D seismic data was acquired during the year over several prospects and leads in the Sampang block and a site survey was undertaken over the Wortel prospect, which is immediately adjacent to the Oyong field. Interpretation of the site survey data indicated that Wortel was likely to be smaller than previously thought and Mangga (formerly West Anggur) was chosen as the next candidate for wildcat drilling.

Mangga is structurally updip from gas and oil shows that were encountered in the Anggur-3 well and has the potential to contain similar hydrocarbon volumes to Oyong. The well will spud in late September 2003 and is expected to take twelve days to reach a total depth of 1,750 metres.

The Joint Venture is also considering a number of other candidates for drilling in 2004.

Plans to drill one or two exploration wells in December 2002 had to be deferred as the required seafloor ordinance clearance survey could not be completed by the Indonesian navy in time.

In July 2003, Cue and Santos bid unsuccessfully on an offshore Indonesian exploration block in the 2003 bid round. We intend to continue to evaluate other Indonesian opportunities, as they become available.

In the coming year we look forward to the results of continued exploration drilling in the Sampang PSC and to beginning the development of the Oyong field. We will also continue to evaluate new exploration and acquisition opportunities in order to grow the company.

# CORPORATE GOVERNANCE STATEMENT

The directors of Cue Energy Resources Limited recognise the need for high standards of corporate governance.

## REMUNERATION AND NOMINATION COMMITTEE

The committee consists of the following:

L Musca (Chairman)

R G Tweedie

The remuneration and nomination committee makes recommendations to the full Board on remuneration packages and other terms of employment and reviews the composition of the Board having regard to the company's present and future needs.

Remuneration and other terms of employment are reviewed annually by the committee having regard to performance and relevant comparative information. As well as a base salary, remuneration packages include superannuation, termination entitlements and fringe benefits.

Remuneration packages are set at levels that are intended to attract and retain capable staff.

Remuneration of non-executive directors is determined by the Board within the maximum amount approved by the shareholders from time to time.

Further information on directors' and executives' remuneration is set out in the Directors' Report.

## AUDIT COMMITTEE

The audit committee consists of the following:

E G Albers (Chairman)

A M Knox

The main responsibilities of the audit committee are to:

- review the annual financial statements with the Chief Executive Officer, the Chief Financial Officer and the external auditors and make appropriate recommendations to the Board;
- review all regular financial reports to be made to the public prior to their release and make appropriate recommendations to the Board;

- monitor compliance with statutory and New Zealand, Australian and Port Moresby Stock Exchanges requirements for financial reporting;
- review reports from management and external auditors on any significant proposed regulatory, accounting or reporting issues, to assess the potential impact on the Company's financial reporting process.

The committee is also charged with the responsibilities of recommending to the Board the appointment, removal and remuneration of the external auditors and reviewing the terms of their engagement and the scope and quality of the audit.

## ETHICAL STANDARDS

The Board has adopted a Code of Ethical Business Standards, a copy of which has been distributed to all employees. The Code sets out the ethical standards expected of all directors and employees in carrying out their duties. The Code is set out under the following main headings:

### Respect the Law and act accordingly

- Dealing with Conflicts of Interest - we will not act in ways which may cause others to question our loyalty to Cue Energy
- Use of Assets (including funds, information and equipment) - use responsibly and in the best interest of the Company
- Maintain Integrity - deal fairly and honestly and treat others with dignity
- Be responsible for our actions and accountable for their consequences.

Pursuant to the Companies Act 1993, the Directors of Cue Energy Resources Limited submit for shareholders' approval their annual report on the affairs and the audited group financial statements of Cue Energy Resources Limited (the Company) and its subsidiaries (the Group) for the year ended 30 June 2003.

# ANNUAL REPORT OF DIRECTORS

## **DIRECTORS**

The names of Directors of the Company in office at the end of the year 30 June 2003 and during the year were: Leon Musca, Richard G Tweedie, Kenneth Hoolihan, E Geoffrey Albers.

## **PRINCIPAL BUSINESS**

The principal business of the group is petroleum exploration, development and production.

Cue Energy Resources Limited ('Cue') is listed on the New Zealand Stock Exchange, the Australian Stock Exchange and the Port Moresby Stock Exchange. During the year the company established an American Depositary Receipt (ADR) program sponsored by the Bank of New York.

## **2002/2003 RESULTS**

Group revenue for the year ended 30 June 2003 was \$7,633,222 (2002: \$12,523,539).

Group expenses totalled \$6,550,327 (2002: \$8,069,678) including production expenses and write-offs.

The operating profit before income tax expense for the year was \$1,082,895 (2002: \$4,453,861). The Group made taxation payments of \$392,108 (2002: \$549,136). The Group profit after income tax expense was \$690,787 (2002: \$3,904,725).

## **OVERVIEW OF OPERATIONS**

### **Papua New Guinea**

Cue's net share of oil production from the SE Gobe field for the year was 138,618 barrels. At the end of the year the field oil production rate was approximately 9,600 barrels of oil per day (Cue net interest approximately 370 barrels of oil per day).

Additional gas injection compression was commissioned in February 2003 for the SE Gobe field and slowed the oil production decline rate.

Bilip-1 was spudded in October 2002 and encountered a 16 metre oil column with an oil water contact, overlain by an interpreted 15 metre gas column in the hanging wall or upper closure of the structure. A closed chamber drill stem test of the oil zone flowed at an estimated rate of 2,000 stock tank barrels of 46° oil per day.

The well was deepened to test the footwall or sub thrust of the structure without success. Cue did not participate in the deepening. The well has been cased and suspended as a future oil producer.

Retention leases were granted over the Kimu (PRL-8) and Barikewa (PRL-9) gas fields.

PPL194 was cancelled after the Minister declined to approve Cue's revised work proposal.

### **Indonesia**

2D seismic was acquired over the Mangga structure in conjunction with a site survey over the Wortel structure. An additional approximately 1,000 km of 2D seismic was acquired over several other prospects and leads.

The Oyong plan of development was completed and submitted to government for approval. Front end engineering and design and environmental impact studies were begun. Pipeline and platform location surveys were undertaken.

Subsequent to the end of the year, a Gas Sales Agreement was signed for the entire reserves of the Oyong field. The gas will be supplied to the PT Indonesia Power electricity generating facility at Grati, East Java.

### **Australia**

The Bob-1 well was drilled in EP363 where Cue has a participation option. The well encountered non commercial gas shows.

## ANNUAL REPORT OF DIRECTORS (CONT')

### SHAREHOLDERS' EQUITY & CAPITAL STRUCTURE

Total Shareholders' Equity as at 30 June 2003 was \$36,496,364 (2002: \$35,666,134). At balance date Cue had share capital of \$83,774,384 (2002: \$83,774,384).

The total number of shares on issue at 30 June 2003 was 333,943,755.

### OPTIONS AND OTHER RIGHTS OF CONVERSION

#### Options

As at 30 June 2003, the following options were outstanding:

#### Unlisted

2,000,000 unlisted options to employees over fully paid shares. Options are exercisable as follows:

	NO. OF OPTIONS (CENTS A\$)	EXERCISE PRICE	EXPIRY DATE
Staff Members	500,000	8	02/05/04
	500,000	10	02/05/04
	500,000	12	02/05/04
	500,000	15	02/05/04

During the year no options were exercised. There were no other rights of conversion.

### ENVIRONMENTAL REGULATION AND PERFORMANCE

The Group holds participating interests in a number of exploration and production licences as detailed in Note 18 to the financial statements. The various authorities granting such licences require the licence holder to comply with the directions and terms of the grant of the licence.

There have been no significant known breaches of the Group's licence conditions.

### FINANCIAL STATEMENTS

The financial statements for the year ended 30 June 2003, immediately follow this report on pages 19 to 41 (including the Directors' Responsibility Statement).

### DIRECTORS' REMUNERATION

Details of remuneration ranges for Directors of the parent and the group are:

REMUNERATION RANGES OF DIRECTORS	NUMBER OF DIRECTORS IN EACH BAND			
	CONSOLIDATED		PARENT	
	2003	2002	2003	2002
\$50,000 - \$59,999	4	1	4	1
\$60,000 - \$69,999	-	2	-	2
\$80,000 - \$89,999	-	1	-	1
\$190,000 - \$199,999	-	-	-	1
\$250,000 - \$259,999	1	-	-	-
\$270,000 - \$279,999	-	1	-	-
\$290,000 - \$299,999	1	-	-	-
\$320,000 - \$329,999	-	1	-	-

AM Knox is a director of all the subsidiaries and an executive of the parent company and holds 1,563,583 shares in the parent company and no shares in the subsidiaries.

RJ Coppin is a director of Cue Energy Holdings Ltd and an executive of the parent company and holds 1,225,000 shares in the parent company and no shares in the subsidiaries.

No remuneration or other benefits are paid by the subsidiaries.

#### DIRECTORS' INTERESTS IN CONTRACTS

Since the date of the last report, pursuant to section 140(2) of the Companies Act 1993, the following directors have declared that they are to be regarded as having an interest in any contract that may be made with the entities listed below by virtue of their directorships or memberships of those entities:

- Corporate fees paid to Leon Nominees of which L Musca is a principal; \$30,250.
- Corporate fees paid to Todd Petroleum Mining Company Limited of which RG Tweedie and K Hoolihan are employees; \$68,750.

No material contracts involving directors' interests were entered into after the end of the previous financial year or existed at the end of the financial year other than the transactions detailed in Note 25 to the financial statements.

#### INFORMATION ON DIRECTORS

DIRECTOR	QUALIFICATIONS AND EXPERIENCE	SPECIAL RESPONSIBILITIES	PARTICULARS OF DIRECTORS' INTERESTS IN SHARES OF CUE ENERGY RESOURCES LIMITED	TOTAL REMUNERATION OTHER BENEFITS

^ Includes shares held by Director related parties.

No shares in subsidiary companies are held by the directors and no remuneration or other benefits were paid or are due and payable by subsidiary companies.

#### INTERESTS REGISTER

Each company in the group is required to maintain an Interests Register in which the particulars of certain transactions and matters involving the directors must be recorded. The Interests Registers for the parent company and its subsidiaries are available for inspection at the head office of the parent company. The matters to be recorded include:

- Directors' remuneration and benefits;
- Transactions in which a director has an 'interest';
- Shareholdings and dealings involving the directors of the company; and
- Indemnity and insurances of directors, employees and auditors.

## DIRECTORS SAVINGS PLAN

Pursuant to the Directors Savings Plan directors are required to purchase, through an appointed trustee, Cue Energy Resources Ltd shares on market for a minimum of 50% of respective directors fees.

## EXECUTIVE REMUNERATION

Details of remuneration ranges for employees of the parent and the group receiving remuneration and benefits above \$100,000 are:

REMUNERATION RANGES OF EXECUTIVES	NUMBER OF EMPLOYEES IN EACH BAND			
	CONSOLIDATED		PARENT	
	2003	2002	2003	2002
\$250,000 - \$259,999	1	-	1	-
\$270,000 - \$279,999	-	1	-	1
\$290,000 - \$299,999	1	-	1	-
\$320,000 - \$329,000	-	1	-	1

## AUDITORS

In accordance with the provisions of the Companies Act 1993 the Company's auditors, PKF Chartered Accountants, (formerly Spencer & Co. Chartered Accountants, effective 1 September 2003, the two firms merged) continue in office. It remains for members to authorise the directors to fix their remuneration at the annual general meeting.

## REMUNERATION OF AUDITORS

Amounts payable to the principal auditor for audit services are \$63,595 and for other services \$2,492.

As detailed in Note 3 to the financial statements.

## DIRECTORS' INSURANCE

In accordance with commercial practice, the insurance policy prohibits disclosure of the terms of the policy, including the nature of the liability insured against and the amount of the premium.

## INFORMATION USED BY DIRECTORS

There were no notices from directors of the Group or Holding Company requesting to use Company information received in their capacity as directors which would not otherwise have been available to them.

## EVENTS SUBSEQUENT TO BALANCE DATE

Subsequent to the end of the financial year a Gas Sales Agreement was signed by Cue Sampang Pty Ltd for the sale of all Oyong field gas to PT Indonesia Power at Grati. The Oyong field is located offshore in the Sampang PSC, East Java, Indonesia.

Other than mentioned above, the directors are not aware of any matter or circumstance since the end of the financial year, not otherwise dealt with in this report or group financial statements that has significantly or may significantly affect the operations of Cue Energy Resources Limited, the results of those operations or the state of affairs of the Company or Group.

On behalf of the Board

RG Tweedie  
Director

K Hoolihan  
Director

Dated in Wellington on this 26th day of September 2003

# DIRECTORS' RESPONSIBILITY STATEMENT

The directors are responsible for ensuring that the financial statements give a true and fair view of the financial position of the Company and the group as at 30 June 2003 and their financial performance and cash flows for the year ended on that date.

The directors consider that the financial statements of the Company and the group have been prepared using appropriate accounting policies, consistently applied and supported by reasonable judgements and estimates and that all relevant financial reporting and accounting standards have been followed.

The directors believe that proper accounting records have been kept which enable, with reasonable accuracy, the determination of the financial position of the Company and facilitate compliance of the financial statements with the Financial Reporting Act 1993.

The directors consider they have taken adequate steps to safeguard the assets of the Company and the group and to prevent and detect fraud and other irregularities.

The directors have pleasure in presenting the financial statements, set out on pages 19 to 41 of Cue Energy Resources Limited for the year ended 30 June 2003.

The Board of Directors of Cue Energy Resources Limited authorised these financial statements for issue on 26th September 2003.

For and on behalf of the Board.

**RG Tweedie**  
Director

**K Hoolihan**  
Director

*Dated in Wellington this 26th day of September 2003*

## 1 STATEMENT OF ACCOUNTING POLICIES

### Entities Reporting

The financial statements presented here are for the reporting entity Cue Energy Resources Limited ('Cue Energy') and the consolidated financial statements of the group comprising Cue Energy Resources Limited and its subsidiaries, joint ventures and associated entity ('the Group').

### Statutory Base

The financial statements have been prepared in accordance with the requirements of the Companies Act 1993 and the Financial Reporting Act 1993. The reporting entity and the group are issuers under the Financial Reporting Act 1993.

### Measurement Base

The financial statements have been prepared on the basis of historical cost, as modified by the revaluation of certain items for which specific accounting policies are identified.

### Accounting Policies

The financial statements are prepared in accordance with New Zealand generally accepted accounting practice. The accounting policies that materially affect the measurement of financial performance, financial position and cash flows are set out below.

### Group Financial Statements

The group financial statements consolidate the financial statements of the subsidiaries, using the purchase method, and include the results of associates using the equity method (where material).

Subsidiaries are entities that are controlled, either directly or indirectly by the parent. Associates are entities in which the parent, either directly or indirectly has a significant but not controlling interest.

All material transactions between subsidiaries or between the parent and subsidiaries are eliminated on consolidation.

The results of subsidiaries or associates acquired or disposed of during the year are included in the consolidated statement of financial performance from the date of acquisition or up to the date of disposal.

### Asset Impairment

Annually the directors assess the carrying values of each asset. Where the estimated recoverable amount is less than its carrying amount the asset is written down. The impairment loss is recognised in the statement of financial performance.

### Exploration and Evaluation Project Expenditure

Costs incurred during the exploration, evaluation and development stages of specific areas of interest are accumulated. Such expenditure comprises net direct costs and an appropriate portion of related overhead expenditure, but does not include general overheads or administrative expenditure not having a specific nexus with a particular area of interest.

Expenditure is only carried forward as an asset where it is expected to be fully recouped through the successful development of the area, or where activities to date have not yet reached a stage to allow adequate assessment regarding existence of economically recoverable reserves, and active and significant operations in relation to the area are continuing.

Where exploration and evaluation and/or acquisition costs have been incurred more than 10 years before the current year end balance date, and provided that no final decision to develop a project has been taken at that time, then such exploration and acquisition costs shall be written off at the tenth anniversary year end of the year in which the costs were incurred.

Costs are written off as soon as an area has been abandoned or considered to be non-commercial.

No amortisation is provided in respect of projects in the exploration, evaluation and development stages until they are reclassified as production properties.

Restoration costs recognised in respect of areas of interest in the exploration and evaluation stage are carried forward as exploration, evaluation and development expenditure.

**Production Properties**

Production properties represent the accumulation of all exploration, evaluation, development and acquisition costs in relation to areas of interest in which production licences have been granted.

Restoration costs recognised in areas of interest after the commencement of production are charged to the statement of financial performance.

Amortisation of costs is provided on the unit-of-production basis, separate calculations being made for each resource. The unit-of-production basis results in an amortisation charge proportional to the depletion of economically recoverable reserves (comprising both proven and probable reserves).

Amounts (including subsidies) received during the exploration, evaluation, development or construction phases which are in the nature of reimbursement or recoupment of previously incurred costs are offset against such costs.

**Property, Plant and Equipment**

All property, plant and equipment are initially recorded at cost. Depreciation is calculated on a diminishing value basis so as to allocate the cost of each item of equipment over its expected economic life. The economic life of equipment has due regard to physical life limitations and to present assessments of economic recovery and varies from 3 to 5 years. Estimates of remaining useful lives are made on a regular basis for all assets, with annual reassessment for major items. Gains and losses on disposal of property, plant and equipment are taken into account in determining the operating results for the year.

**Cash**

For purposes of the statement of cash flows, cash includes deposits at call which are readily convertible to cash on hand and which are used in the cash management function on a day-to-day basis, net of outstanding bank overdrafts.

**Employee Entitlements**

Employee entitlements to salaries and wages, annual leave, long service leave and other benefits are recognised when they accrue to employees. The liability for employee entitlements is carried at the present value of the estimated future cash outflows.

**Joint Ventures**

When a member of the group participates in a joint venture arrangement, the member recognises its proportionate interest in the individual assets, liabilities and expenses of the joint venture. The liabilities recognised include its share of those for which it is jointly liable.

Details of major joint venture interests are set out in Note 18.

**Income Tax**

The tax expense recognised for the year is based on the accounting surplus, adjusted for permanent differences between accounting and tax rules.

The impact of all timing differences between accounting and taxable income is recognised as a deferred tax liability or asset. This is the comprehensive basis for the calculation of deferred tax under the liability method.

A deferred tax asset, or the effect of losses carried forward that exceed the deferred tax liability, is recognised in the financial statements only where there is virtual certainty that the benefit of the timing differences, or losses, will be utilised.

**Goods and Services Tax (GST)**

The Statement of Financial Performance and Statement of Cash Flows have been prepared so that all components are stated exclusive of GST. All items in the statement of financial position are stated net of GST, with the exception of receivables and payables, which include GST invoiced.

**Investments**

Investments in subsidiaries and associates are recorded at the lower of cost or Directors' valuation calculated on an individual basis. Where in the opinion of the directors there has been a permanent diminution in the value of investments, this has been recognised in the current period. Other investments are stated at fair market value. Advances to subsidiaries and associates are recorded at estimated realisable value.

**Unearned Income**

Unearned income represents an entitlement to a reimbursement of revenue arising from a redetermination of participants share of oil and gas reserves in the South East (SE) Gobe Unit in Papua New Guinea.

**Foreign Currencies**

Assets and liabilities expressed in foreign currencies are converted to New Zealand dollars at the rate of exchange ruling at balance date. Profits and losses on exchange, both realised and unrealised, are recognised in the period in which they occur by way of a credit or charge in the Statement of Financial Performance.

Assets and liabilities of overseas subsidiaries are translated at exchange rates existing at balance date and the exchange gain/loss arising on translation is reflected in the Statement of Financial Performance. The activities of the subsidiaries are an integral part of the operations of the Company.

**Financial Instruments**

Financial instruments carried on the Statement of Financial Position include cash and bank balances, receivables, investments, payables and borrowings. These instruments are, generally, carried at their estimated fair value. For example, receivables are carried net of the estimated doubtful receivables. The particular recognition methods adopted are disclosed in the individual policy statements associated with each item.

Full disclosure of information about financial instruments to which the Group is a party is provided in Note 21.

**Equity****Share Issue Costs**

Costs associated with the issue of shares are recognised as a reduction of the amount collected per share.

**Changes in Accounting Policies**

During the year, the Group and Parent company changed the following accounting policies:

**(a) Exploration & Evaluation Project Expenditure**

Under the new policy, costs that have been incurred more than ten years before the current year-end balance date shall be written off, provided that no final decision has been taken to develop a project and exploration activities in that area are continuing. Formerly, the policy was to write off costs incurred more than five years before the current year-end balance date.

This change in policy has resulted in exploration and evaluation costs of \$1,423,005 not being written off during the financial year.

**(b) Investments**

Under the new policy, marketable securities shall be carried forward at fair market value. Formerly such investments were carried forward at the lower of cost or Directors' valuation.

As a result of changing the accounting policy, an asset revaluation reserve has been recognised for the value of \$139,443, representing the increase to fair value of the marketable securities held.

There have been no other changes in accounting policies.

## (i) Convertible Note

The company acquired a convertible note for \$246,000 (AUD 200,000) in Bambuu Ltd (Bambuu) with a coupon rate of 10% per annum. The company had a conversion right whereby the note may be converted into ordinary fully paid shares in Bambuu at a price of A\$2.5 cents at any time on or before 12 July 2003. The note was repaid in full during the year.

## (iii) Change in Accounting Policy

As per Note 1, under the new policy, marketable securities shall be carried forward at fair market value. Formerly such investments were carried forward at the lower of cost or director's valuation. As a result of changing this accounting policy, an asset revaluation reserve (Note 7) has been recognised for the value at \$139,443, representing the increase to fair value of the marketable securities held.

## NOTES TO THE FINANCIAL STATEMENTS

	CONSOLIDATED		PARENT	
	2003 \$	2002 \$	2003 \$	2002 \$
<b>20 CAPITAL COMMITMENTS - EXPLORATION ACTIVITIES</b>				
In order to maintain current rights of tenure to petroleum exploration tenements, the Group has discretionary exploration expenditure requirements up until expiry of the primary term of the tenements. These requirements, which are subject to renegotiation and are not provided for in the financial statements, are payable as follows:				
Not later than one year	-	1,972,000	-	-
Later than one year but not later than 2 years	-	-	-	-
Later than 2 years but not later than 5 years	-	-	-	-
Later than 5 years	-	-	-	-
	-	1,972,000	-	-

If the economic entity decides to relinquish certain tenements and/or does not meet these obligations, assets recognised in the balance sheet may require review in order to determine the appropriateness of carrying values. The sale, transfer or farm-out of exploration rights to third parties could potentially reduce or extinguish these obligations.

All commitments relate to Joint Venture projects.

## 21 FINANCIAL INSTRUMENTS

The Group is subject to a number of financial risks that arise as a result of its exploration and production and borrowing activities.

To manage and limit the effects of financial risks the board of directors has approved the use of various financial instruments.

The policies approved and financial instruments being utilised at balance date are outlined below.

### (a) Credit Risk

Financial assets that potentially subject the group and parent company to concentrations of credit risk consist principally of cash and receivables. The parent company and group's cash equivalents are placed with high credit quality financial institutions. Trade receivables are presented net of any allowance for estimated doubtful receivables. Accordingly the directors believe the group has no significant concentration of credit risk.

### (b) Interest Rate Risk

Interest rate risk is confined to movements in interest rates for funds on deposit with financial institutions. Group borrowings are at rates of interest fixed for the periods of the respective borrowings.

### (c) Foreign Exchange Risk

The Group is subject to foreign exchange rate risk on its international exploration and appraisal activities where costs are incurred in foreign currencies, in particular United States Dollars and Australian Dollars.

The board approved the policy of holding funds in both United States and Australian Dollars respectively to manage foreign exchange risk.

### (d) Commodity Price Risk

The Group is involved in oil and gas exploration and appraisal and since April 1998 has received revenue from the sale of hydrocarbons. Exposure to commodity price risk is therefore limited to this production and from successful exploration and appraisal activities which at this stage cannot be measured. No hedging arrangements have been made.

### (e) Fair Values

The carrying amount of cash and bank overdraft balances reflect their fair values. Information on the fair values of all other financial instruments recognised in the financial statements is included in the relevant notes to the financial statements.

The fair value of recognised financial instruments equates to the net carrying amount shown above.

## 22 EARNINGS PER SHARE

	2003	2002
Basic earnings per share (cents per share)	0.21	1.17
Weighted average number of ordinary shares outstanding during the year (adjusted for ordinary shares issued during the year) used in the calculation of basic earnings per share	333,943,755	333,850,920

## Information Concerning the Classification of Securities

- (a) All outstanding Options are considered to be potential ordinary shares and have been included in the determination of diluted earnings per share. However diluted earnings per share are not materially different from basic earnings per share and have not been disclosed. The options have not been included in the determination of basic earnings per share. Details relating to the options are set out in Note 6(c).
- (b) Since the end of the financial year there have been no conversions to, calls of, or subscriptions for ordinary shares or issues of potential ordinary shares since the reporting date and before the completion of these financial statements.

The Surplus/(Loss) is that of the Group after income tax.

The Group operates predominantly in petroleum exploration, development and production.

## 24 CONTINGENT GAINS AND LOSSES

The following amount has not been recognised in the financial statements because of the uncertainty associated with their outcomes.

- (a) Cash and bank balances includes an amount of \$75,000 which is subject to a charge in support of an irrevocable guarantee in the amount of \$75,000 given by the Company to the New Zealand Exchange.

**25 RELATED PARTY INFORMATION****Related party transactions and balances****Members of the Board of Directors**

The directors in office during the year were L. Musca, R. Tweedie, K. Hoolihan and E.G. Albers.

During the year Directors' fees for the parent company of \$222,020 were paid (2002: \$261,724) [Note 4]. Included in this amount are cash payments of \$68,750 on behalf of two directors (\$34,375 each), to Todd Petroleum Mining Company Limited, of which two directors are associated, and \$30,250 to Leon Nominees of which one director is associated.

Directors' fees for the consolidated entity of \$776,499 were paid (2002: \$860,771) [Note 4]. Includes payments made to two directors of subsidiary entities, R. Coppin and A. Knox.

During the year the Group incurred expenditure for reimbursement of expenses and for services rendered by directors as follows: L. Musca reimbursement of expenses \$875 (2002: \$21,780), E.G. Albers reimbursement of expenses \$511, R. Tweedie reimbursement of expenses \$8,129, and K. Hoolihan reimbursement of expenses \$6,584. The expenditure has been included in expenses and any amounts payable included in accounts payable to directors and director related entities shown in Note 17.

**Director Related Entity Transactions**

A convertible loan of A\$200,000 (NZ\$235,000) was repaid in full by Bambuu Ltd during the financial year.

There were no director related entity transactions during the year other than those disclosed.

**Subsidiaries**

Details of subsidiary companies are shown in Note 13. The realisable value of advances to subsidiaries and amounts owed to subsidiaries are shown in Note 14. Provision has been made by the parent company for possible non-recovery of loans to subsidiaries of \$24,394,470 (2002: \$24,614,168).

Repayment of amounts owing to the Company at 30 June 2003 and all future debts due to the Company, by the subsidiaries are subordinated in favour of all other creditors. Cue Energy has agreed to provide sufficient financial assistance to the subsidiaries as and when it is needed to enable the subsidiaries to continue operations.

The parent company provides management, administration and accounting services to the subsidiaries. A management fee of \$552,000 (2002: \$582,400) and interest of \$675,019 (2002: \$1,113,178) was charged respectively by the parent company to Cue PNG Oil Company Pty Ltd.

We have audited the financial report on pages 18 to 41. The financial statements report provides information about the past financial performance and cash flows for the year ended 30 June 2003 of the Company and Group and their financial position as at that date. This information is stated in accordance with the accounting policies set out in Note 1.

#### **Directors Responsibilities**

The company's directors are responsible for the preparation and presentation of the financial statements which gives a true and fair view of the financial position of the Company and Group as at 30 June 2003 and their financial performance and cash flows for the year ended on that date.

#### **Auditors' Responsibilities**

We are responsible for expressing an independent opinion on the financial statement presented by the directors and report our opinion to you.

#### **Basis of Opinion**

An audit includes examining, on a test basis, evidence relevant to the amounts and disclosures in the financial report. It also includes assessing:

- the significant estimates and judgements made by the directors in the preparation of the financial statements, and
- whether the accounting policies are appropriate to the Company and Group's circumstances, consistently applied and adequately disclosed.

We conducted our audit in accordance with generally accepted auditing standards in New Zealand. We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatements, whether caused by fraud or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

We have no other relationship with or interests in the Company or any of its subsidiaries other than in our capacities as auditors under the Companies Act 1993, tax advisors and providers of other assurance services.

#### **Unqualified Opinion**

We have obtained all the information and explanations we have required.

In our opinion:

- proper accounting records have been kept by the company as far as appears from our examination of those records; and
- the financial statement on pages 18 to 41
  - comply with generally accepted accounting practice in New Zealand; and
  - gives a true and fair view of the financial position of the Company and Group as at 30 June 2003 and their financial performance and cash flows for the year ended on that date.

Our audit was completed on 26th September 2003 and our unqualified opinion is expressed as at that date.
